Assessment-driven results across
fitness, wellness, performance and clinical care.

Why Visbody?

1. World's First BDA + BIA integration
Unified body assessment and health analytics anaylsis for deeper, more accurate insights and results.

2. Instant 3D Modeling - Every Change Visible
Real-time 3D body modeling makes progress visible, measurable, and motivating.

3. WellnessHub + Kuafu AI Programs.
Ai powered programs and ecosystem tools that support personalized plans and continuous engagement.

4. From Static to Dynamic - Posture, Balance & Performance Insights
Comprehensive anaylsis across posture, balance, and performance.

Who We Are: A 3D & AI body assessment tech innovations.
Visbody is a global leader in AI-powered 3D scan and wellness assessment solutions, driven by proprietary Body++ technology and driven within, built--with 100% data privacy.

What We Solve: Visualized Progress & Standardized Delivery
We help businesses and care teams streamline workflows and classify valuable user progress across body, habits, and perfomance indicators to improve outcomes.

How We Scale: WellnessHub + Kuafu AI
Powered by the WellnessHub ecosystem and the Kuafu AI industry model, we support millions of users across 29,000+ locations in 90 countries.

Ai-Tech Corporate: Taipei, Taiwan | Shanghai

Product Excellence

As an intelligent hardware manufacturer, Visbody operates advanced automated production processes and full quality control across precision robotics. CNC machining, and laser cutting. Every unit undergoes rigorous assembly, testing, and pecking to deliver exceptional quality, reliability, and performance at scale.

VISBODY M60

Complete 3D Body Assessment. High-Precision.

Advanced intelligent body assessment solutions for fitness, beauty, weight loss, and recovery. Built on Visbody's proprietary Body ++ digital health technology, combining advanced body anaylsis. 3D imaging and AI analytics captures 360 degrees body modeling composition, posture, structure, and movement with clinical-grade precision.

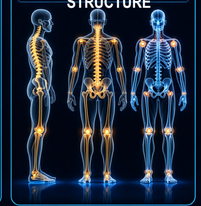

Industry Leading BIA + BDA Algorithms. Proprietary fusion of BIA (Bioelectrical Impedance Analysis) and BDA (Body Density Assessment) delivers more accurate body composition analysis & enhanced data stability.

1. BODY COMPOSITION

18+ metrics, multi-frequency BIA, segmented analysis.

2. POSTURE + STRUCTURE

10+ postural deviations & 3D skeletal landmarks.

3. CIRCUMFERENCE ASSESSMENT

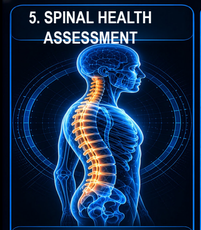

14 key circumference body measurements & 3D comparison.

4. GLUTE SHAPE ANALYSIS

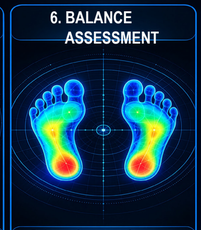

Ai-based glute profile 3D view classifications.

5. SPINAL HEALTH ASSESSMENT

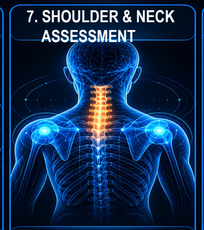

Spine, pelvic risk & muscle imbalance analysis.

6. BALANCE ASSESSMENT

Balance & center-of-pressure visualization.

7. SHOULDER & NECK ASSESSMENT

Upper-body mobility analysis.

8. AB & WAIST ANALYSIS

Waist segments, abdominal volume & shape.

BUILT FOR BETTER OUTCOMES

Fitness & Health Clubs | Rehabilitation & Physical Therapy | Wellness & Med Spa | Sports Performance & Training | Education & Research | Weight Management & Health | Medical, Clinic & Hospital Settings

Visbody Omni Quad Scanner / T55

The World's Leading 4D Intelligent Body Assessment System.

FULL-BODY 4D SCANNING & MOVEMENT ANALYSIS

FMS, Fitness & More.

Capture. Analyze. Understand. Perform. The most advanced 4D scanning system for posture, motion, and performance-powered by AI. A unified platform integrating body fundamental movement assessment, body assessment, and physical fitness tracking to redefine professional health manaagement.

BODY DIGITAL TWIN
Combines 18 body metrics. 14 automated circumferences, vital capacity & grip strength in one digital profile.

AI-DRIVEN FMS & CORRECTIVE GUIDANCE
AI-vision analyzes 10 standard FMS movements in real time. Identifies injury risks compensations, and recommends personalized corrective exercises.

EXPERT INTERACTIVE EXPERIENCE
A 32-inch motorized rotating touchscreen provides real-time coaching videos and and error-correction prompts for professional testing accuracy.

Actionable insights & performance optimization.

Secure. Private. Compliant.

Key Highlights

- 4D Full-Body Scan in Seconds.
- Posture, Movement & Alignment Analysis.
- Joint Mobility & Range of Motion. Detail Flexibility, and movements.
- Muscle Symmetry & Bilateral Balance Tracking.
- Ai-Driven Smart Analysis with actionable insights.
- FMS, Fitness & Interactive Real-Time Testing.

Advanced AI posture & movement.

Fast intelligent capture for quick body assessment.

Visbody R70 3D Intelligent Posture and Spine-Pelvis Assessment Analyzer

Ai-Powered * Radiation-Free * Full-body Biochemical Anaylsis for rehabilitation, screening, and musculoskeletal insight. Body Assessment System.

Medical-Grade

3D Curvature Analysis
Visualize cervical, thoracic, lumbar curves and deviations.

Pelvis Align Check
Detect tilt, rotation, and imbalance with precision.

Posture-Movement Analysis: Identify imbalances and postural compensations.

A+ Reports
Detailed reports with actionable insights.

Visbody Creator 600

3D Intelligent Ai Treadmill.

Ai-Powered Running Intelligence. Gait Analysis. Immersive Training.

Visbody Ai-Viscan Motion Capture. Real-time performance data.

Advanced Gait & Running Form. Evaluates running mechanics. Stance phase, gait velocity, heel strike and hip flexion. Helps to identify gait abnormalities and much more.

4D Depth Vision + High Speed Processing. Depth-camera/vision sensor system. Advanced leading Ai-algorithms analyze running form.
